Young, Edward S., Jan., p. 60

ISSUE THEMES

Jan.—**Forecast:** welding in the '70's by industry leaders; plus precious metals boosting brazing uses; plasma-arc welding nickel alloys; welding titanium with plasma-arc.

Feb.—**Distortion:** how to minimize it: how to choose a welding distributor; reverberatory welding.

Mar.—**Plasma Cutting:** plasma-arc cutting; plasma torch cutting; sub-arc, high-basic fluxes welding strong steel.

April—**Flux-cored welding; AWS Welding Show:** flux-cored wire . . . gas or gasless; welding the new PH alloys; joining nuclear plates in single vertical pass; AWS show preview.

May—**Heavy Section Welding:** liquid-filled welded steel building columns offer fireproofing economy; EB welding titanium; plus ATVI luring industry through welder-plus training; training and employment of welding technicians; repair welding.

June—**Nondestructive Testing:** gamma camera assures pipe integrity; directory of equipment and materials for NDT; how dangerous is radiation in NDT; program of AWS 51st annual meeting.

July—**Fact File Directory:** Fact File '70; plus tetra construction at Japan's Expo '70; statistical survey of the year in welding industry; stress relieving.

Aug.—**Materials Handling in Weld Fabrication:** fixturing and automation; CO_2 laser welding; welding technology; Alaskan welder certification law.

Sept.—**Arc Welding Process Usage Survey:** survey; programmed Mig joins tubing; flux-cored wire at work; Mig boosts Track-mobile production; surface resistivity on RW of Inconel 718.

Oct.—**Ventilation for Welding; Materials Show; Safety Show:** ventilation for welding; fume-collecting welding guns; programmed Tig welder joins nuclear tubing; EB joins roller bearing industry; ASM Metal Show "firsts"; National Safety Congress Show.

Nov.—**Buildup and Overlay Welding:** hardfacing: picking the proper alloy; bulk-welding offers hardfacing pluses; gas shielding techniques for welding titanium; Tig welding the Lunar Module.

Dec.—**Joining Dissimilar Metals:** friction welding joining dissimilar metals; shielding gases cutting porosity in welding Hastelloy C; linear phase shift current control for RW.

FEATURE ARTICLES

(Original articles boldfaced; all others are cross-references)

A

Aesthetics wins in steel structures, Mar., p. 58
Age 29, flame cutter still in use at, April, p. 83
Alaska passes welder certification law, Aug., p. 52
Alloy, proper, picking the, Nov., p. 39
Alloys, PH, welding the new, April, p. 72
Aluminum weld distortion: By-pass by vibrating, May, p. 47
Annual meeting, AWS 51st, program of, June, p. 68
Annual pictorial review, Showtime '70, July, p. 30
Application, tape eases brazing material, Oct., p. 64
Arc welding process usage, survey of, Sept., p. 44
ATVI lures industry through welder-plus training, May, p. 52
Auto body production, manipulator speeds, Aug., p. 41
Automated welder assembles hood panels, April, p. 88
Automation, fixturing—key to profits at Tri-Par, Aug., p. 37
Award-winning work, Aug., p. 54
AWS, program of 51st annual meeting, June, p. 68
AWS-WRC, first international brazing conference, June, p. 72

B

Bearing, roller, EB joins industry, Oct., p. 50
Biggest and best—but not up to expectations, July, p. 27
Brazing conference, AWS-WRC, first international, June, p. 72
Brazing uses, precious metals boost, Jan., p. 38
Bulkwelding offers hardfacing, overlaying pluses, Nov., p. 49

C

Camera, gamma, assures pipe integrity, June, p. 45
CB&I boasts 5-purpose plant, April, p. 82
Certification law, welder, Alaska passes, Aug., p. 52
Characteristics, unique, of welding technology, Aug., p. 45
Choice, joint design determines, April, p. 60
Choose a welding distributor for his total value to you, Feb., p. 42
CO_2 laser welding joins the parade, Aug., p. 42
Coating, pre-weld, assists in ship repair job, Jan., p. 77
Columns and girders, welded steel, liquid filled (Fill 'er up) May, p. 48
Concern, a cause for, stress relief, July, p. 35
Congress, National Safety, aids welding industry, Oct., p. 60
Cool gun welds 140-ton crane frames, April, p. 70
Cost, cleanliness, ornamental iron firm goes Mig with, May, p. 63
Costs, barge plates, propane torches trim, April, p. 86
Crane frames, cool gun welds 140-ton, April, p. 70
Current control, linear phase shift, for RW, Dec., p. 52
Cutter, flame, still in use at age 29, April, p. 83

D

Dam, thermit joins rebars at, June, p. 65
Dangerous, how is radiation in NDT?, June, p. 55
Design, joint, determines choice, April, p. 60
Directory of equipment and materials for NDT June, p. 49
Distortion, aluminum weld, by-pass by vibrating, May, p. 47
Distortion . . . how to minimize it, Feb., p. 37
$$$, harrow parts harvest, June, p. 66

E

EB joins roller bearing industry, Oct., p. 50
EB welding titanium May, p. 66
Editorials: On coming of age, Jan., p. 37; Room for improvement, Feb., p. 33; It's about time, Mar., p. 43; A new look, April, p. 41; Will we do it?, May, p. 45; Technological brinksmanship, June, p. 43; Show impressions, July, p. 23; What's happening?, Aug., p. 35; How to retire at 35, Sept., p. 41; Ventilation for welding, Oct., p. 37; A growing process, Nov., p. 37; Worth an order, Dec., p. 41
Effect of surface resistivity on RW of Inconel 718, Sept., p. 52
Elbow production, plasma torch cutting doubles, Mar., p. 48
Employment, and training of welding technicians, May, p. 56
Engineering data sheets: No. 353, Electrode comparison: E70XX VS E60XX, Jan., p. 67; No. 354, Recommended welding lens shades, Feb. p. 46; No. 355, Resistance weld defects and causes, Mar., p. 61; No. 356, Flux-cored arc welding electrode test and mechanical property requirements, April, p. 93; No. 357, Reason for and proposed sequence of welding, May, p. 75; No. 358,

You have not heard about TRUMPF'S complete range of Sheet Metal Working Hand Tools.

Trumpf's full line of hand tools add economy and portability to production of sheet metal products. Nibbling cutouts, plate shearing, and plate beveling for welding preparation are examples of the many applications performed "at the workpiece" with these tools.

A new series of data sheets describing applications and complete specifications is available on request.

Circle No. 185 on Welding Info-Aid Card

NEW! ENERPAC "Hushh-Pump" SERIES
the fastest (as well as quietest) hydrauiic pumps in their class

Here is the first electric-powered *hydraulic pump* on the market rated for round-the-clock use under the new government Walsh-Healey noise-control act. Entirely new, this ENERPAC Hushh-Pump is literally *twice* as quiet as competitive models. ☐ It's unmatched for performance, too. Unique two-stage design combines a precision gerotor pump for extra-high-flow up to 500 psi : . . plus a supercharged radial piston pump for full power operation up to 10,000 psi. Result? It's the fastest—as *weli* as the quietest—pump in its class, delivering over 3 GPM at up to 200 psi; over 2 GPM at 400 psi; 62 cu. in. at 6,000 to 10,000 psi. ☐ Available in many different styles, including remote push-button models. For full data, write ENERPAC, Butler, Wisconsin 53007, or phone (414) 781-6600.
